Internal Developer Platforms

Experience

Aug 2026 - Present

Freelance Platform Enablement Specialist

Self-employed — Frankfurt, Germany / Remote

- Working as an independent contractor supporting an Energy Data Platform for a critical-infrastructure client in the energy sector
- Driving developer enablement for an internal developer platform (IDP), lowering cognitive load and accelerating team onboarding across the platform
- Working closely with the Customer Success team and the Cloud Native Application Governance team
- Creating technical educational content for the developer organization according to the operating model defined by Cloud Native Application Governance
- Supporting tenants through their onboarding journey to the platform
- Producing enablement content from concept to publication, including video tutorials, hands-on labs, storyboards, and workshops, following the Diátaxis documentation framework
- Defining and tracking enablement KPIs such as adoption, self-service usage, and developer productivity across platform teams

Jan 2025 - Jul 2026

DevOps Squad Lead

Deloitte Consulting — Frankfurt, Germany

- Led two workstreams with a combined team of 6 consultants across multiple seniority levels
- Was technical lead and platform engineer for Volkswagen's DevOps Enabling Team within ART FSS
- Developed a self-service CDK library fully compliant with Volkswagen's AWS Vanguard framework
- Automated CI/CD pipelines and designed scalable EKS-based deployment architectures
- Drove end-to-end implementation of the ART-wide observability strategy covering metrics, logs, traces, and business KPIs
- Integrated Elastic Stack as the central monitoring platform, including OTLP pipelines and Helm chart extensions
- Implemented SonarQube scanning and SBOM generation in CI pipelines for microservices
- Built FOSS license compliance pipelines with Black Duck Hub

Apr 2024 - Dec 2024

DevOps Tech Lead

Deloitte Consulting — Frankfurt, Germany

- Led infrastructure automation initiatives and CI/CD pipeline development for Volkswagen and Audi
- Mentored and provided technical direction to a team of three Deloitte engineers
- Designed and implemented release concepts for workloads on OpenShift edge clusters
- Developed cloud-native system and load testing automation for Data Capture Application (DCA)
- Integrated Tekton pipelines with XRAY and Jira to streamline testing workflows

Dec 2023 - Apr 2024

Senior Solutions Architect

Deloitte Consulting — Frankfurt, Germany

- Directed development of PoC for Google Cloud's Manufacturing Data Engine for Deloitte-Google Alliance
- Applied FinOps principles and GCP Well-Architected Framework best practices
- Built advanced pipelines for Kubernetes node scheduling and on-demand infrastructure provisioning
- Delivered technical presentations to prospective Deloitte clients

Feb 2025 - Present

Community Group Organizer

Cloud Native Frankfurt — Frankfurt Rhine-Main Area

- Organizing Cloud Native community events and meetups in Frankfurt region
- Building local CNCF community and fostering knowledge sharing
- Connecting cloud-native practitioners and enthusiasts

Apr 2024 - Present

Content Creator - Cloud-Native Technologies

Self-employed — Remote

- Developing hands-on training materials and interactive scenarios on killercoda.com/aghilish
- Creating and managing a YouTube channel with tutorials and practical guides
- Topics include Kubernetes, containerization, cloud platforms, and DevOps best practices

Oct 2023 - Nov 2023

Freelance Senior DevOps Engineer

CARIAD — Remote

- Successfully migrated Infotainment software build pipeline from CARIAD DevStack to GitHub Enterprise CI/CD

Feb 2023 - Sep 2023

Senior Platform Engineer

Commerzbank AG — Frankfurt, Germany

Certifications

- CNCF Community Organizer 2024
- Agentic AI Certification
- GCP Professional Cloud Architect
- CKA: Kubernetes Administrator
- CKS: Kubernetes Security

- Led engineering backlog ensuring platform's continuous development and team alignment
- Guided and mentored team of junior cloud-native engineers
- Spearheaded migration of microservices to multi-regional Google Anthos setup with mTLS enforcement
- Consulted CCoE on CVE remediation, image hardening, OPA policies, and securing service boundaries

Mar 2021 - Feb 2023 **Platform Engineer**

Commerzbank AG — Frankfurt, Germany

- Engineered robust deployment pipeline for KYC ETL process
- Implemented and maintained Infrastructure as Code (IaC) practices
- Designed and managed CI/CD pipelines to streamline development workflows
- Contributed to design and implementation of scalable microservices-based solutions

Jun 2019 - Feb 2021 **Backend Engineer / DevOps**

Main Incubator GmbH — Frankfurt, Germany

- Contributed to small agile incubator team developing cloud-native applications on GCP
- Dual role in backend development and DevOps
- Utilized Firebase, Node.js with TypeScript, and React.js

Dec 2016 - Dec 2018 **Researcher - PhD Dropout**

Technische Universität Darmstadt — Darmstadt, Germany

- Contributed to development and optimization of 5G mm-wave network technologies
- Utilized Python, C++, and MATLAB for network design, simulation, and implementation

Oct 2015 - Oct 2016 **Senior Software Engineer**

Parham Co. — Tehran, Iran

- Delivered comprehensive full-stack solutions leveraging expertise in front-end and back-end development

Sep 2014 - Sep 2015 **Research Assistant**

Sharif University of Technology — Tehran, Iran

- Focused on Software Defined Networks (SDN) with innovative network architectures
- Thesis: "Distributed Publisher-Subscriber Pattern for Content-Based Routing in SDN"

Mar 2012 - Nov 2014 **Senior Software Developer**

Solico Group — Tehran, Iran

- Specialized in creating robust and scalable back-end solutions for enterprise applications

Oct 2011 - Feb 2012 **Software Developer**

Telecomsoft — Tehran, Iran

- Designed and developed simulation tool for routing and bundling in optical networks
- Commissioned by Iranian Telecommunication Research Center (ITRC)

Education

2016 - 2018 **PhD in Computer Science (Dropout)**

Technische Universität Darmstadt — Germany

Research focus on 5G mm-wave network technologies

2013 - 2015 **Master of Science in Information Technology**

Sharif University of Technology — Tehran, Iran

Thesis on Software Defined Networks and Content-Based Routing

2007 - 2011 **Bachelor of Science in Computer Engineering**

Isfahan University of Technology — Isfahan, Iran
